

## ROES Version 9 Changes

### Home Pane – New Log In/Log Out

Customer Authentication/Customer Specific Templates: The ROES v9 Home pane offers enhanced functionality for customer authentication to allow access to the program and customer specific templates.

The screenshot shows a web form titled "My Account". It contains two input fields: "Account No." and "E-mail Address". Below the fields is a "Log In" button.

When customer authentication is on or a Customer element is present in the templates file, the Log In button will appear. Fields such as Account Number will appear for entry (we can define which fields should show in the startup files hosted here).

The screenshot shows the "My Account" form after a successful login. The "Account No." field now contains the number "12345678" and the "E-mail Address" field contains "sbara@softworkssystems.com". The "Log In" button has been replaced by a "Log Out" button.

Once Log In is clicked, the fields will become unavailable for changes and Log Out will show for the button label. A studio with multiple photographers sharing a system can now utilize different Customer specific templates files or different account numbers with your lab.

### Other Core Changes

New Preference:

Preferences in the Home pane now includes a checkbox to close the sizes/products pane when going into the new Books Wizard:
